

## WEBeDoctor brings next level innovative Self Service Patient Check-In Kiosk

The quality of the relationship patients have with their physician deeply impacts their ability to live longer, healthier lives. That's why it's critical that physician office visits offer efficient and easily accessible care. Improved efficiency allows providers to increase the total number of patients they serve.

The easier it is for patients to schedule a visit and see their doctor in a timely fashion, the more likely the patient is to follow recommended guidelines for follow-up appointments and preventative care. The WEBeDoctor method for next-level, more innovative patient self-registration kiosk reduces patient wait times to just a few minutes or less.

By putting patients in charge of check-in, patients gain greater time for one-on-one contact with you, their physicians. In an era of value, WEBeDoctor automated Self Service Patient Check-In Kiosk sets the stage for your practice's success, saving physicians, and patients time and money.

- **Increased Point-of-Service Collection**
- **Improved Performance**
- **Front-Desk staff are able to focus on other duties**
- **Reduction in Patient Registration Error**
- **Decrease in Paper Cost**
- **Fewer walkaways**
- **Shorter wait times**
- **Decrease in patient complaints**

## How it Works

WEBeDoctor connected technologies increase efficiency and patient throughput for your primary care practice, eliminating a trip to the front desk.

With the touch of a few buttons, your patients can:

- ▶ Alert office staff that they have arrived
- ▶ Verify or change their address, insurance information, health status, update other demographics as well as driver's license and their own picture
- ▶ Sign consent forms
- ▶ Notify office staff of their communication preferences (Spanish or English)

## How WebeDoctor is different?

### ▶ Greet patients

Patients sign in themselves and automatically join the right line. You get a load off your back, and your customers feel more in control. It's a win-win for all.

### ▶ Inform patients

Inform patients about service status to give them peace of mind. They do not have to worry about missing their turn anymore

### ▶ Serve patients

As customers take care of sign-in, you are free to greet them and make sure they're having a good time.

### *System Requirements*
