Introducing WEB e Telehealth®

Stay in contact with patients remotely during or after COVID-19

WEBeDoctor want to provide you with the tools you need to help patients remotely and keep your doors open throughout this crisis.

Taking advantage of web-based communication, through secure video and audio, helps physicians and healthcare providers stay in contact with patients.
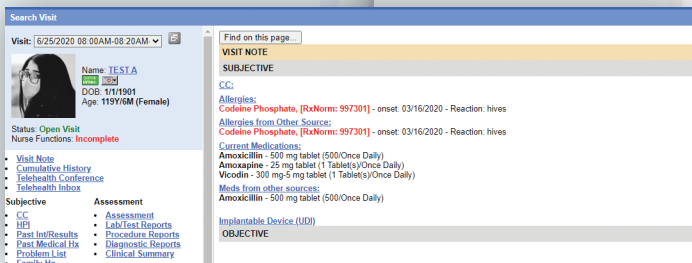

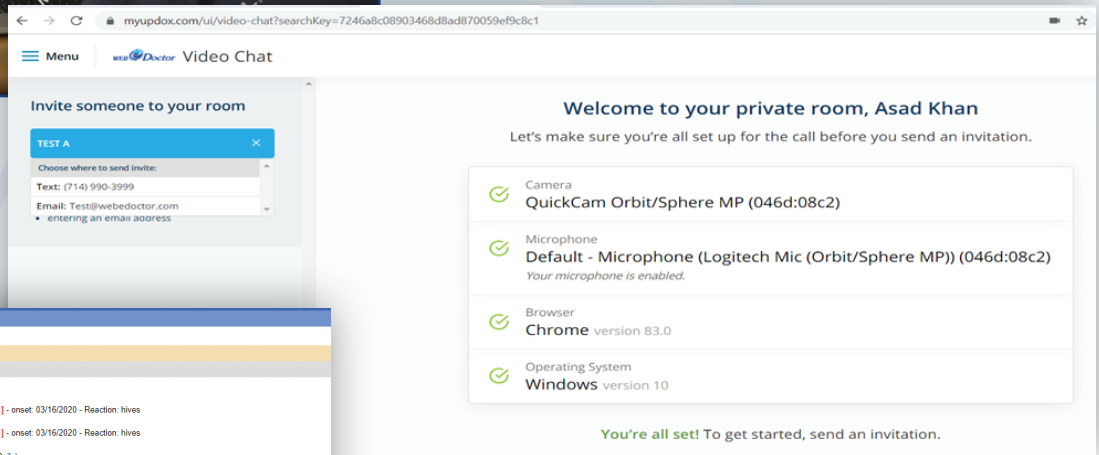

- ➤ **HIPAA-compliant Video Chat**
- ➤ **SMS Texting**
- ➤ **Secure Texting**
- ➤ **Built-in to Visit Note**
- ➤ **Allow picture capturing**
- ➤ **One step connection to patient by Text or email invite**

Video Chat

HIPAA-compliant video and audio that is web-based, meaning there's no app to download or equipment to buy, and works on most smartphones, laptops, tablets, and desktop computers.

Telehealth Inbox

Send a text link to your patient, they click on the link, and you start the conversation. Take photos via video as well as notes and save them to the patient's file.

Two Way Texting

Use texts to easily text with everyone in your address book. Send secure texts to patients, families, pharmacists or other specialists. Avoid wasting time on phone calls with HIPAA-compliant texting.

System Requirements
