

Web Based ASP Solution  
**Physician-office®**

**Effective Management  
Better Performance!**

## Fully Integrated Practice Management and EHR system for ASP Service

**WEBeDoctor® Physician-office®** is an Internet productivity tool for Physicians, (Solo Practice, Group practice and Managed care), to complete their normal duties in a practice. It is a complete front office system that includes appointments, insurance, scheduling, EMR and billing. It is designed to save personnel time, keep expense down and gives the physician better management control.

The problem in the health care industry is that there is tremendous amount of paper work involved. Medical Professional are tied up with completion of this paper work instead of providing quality services to the patient, plus they have to update themselves with the most up to date information regarding the discoveries and changes in the field. These extra responsibilities relieve medical professionals to tedious detail work, but rarely do they offer a means to substantially maximize the practices bottom line.

Physicians need an inexpensive, efficient mechanism for performing the myriad of complex administrative, financial and clinical tasks involved in running today's medical practice. Ultimately, technology is the answer, but it must be easy to use, reliable and provide the security demanded by both patients and HIPAA regulations. Physicians need a system that provides the information necessary to make the right care decisions as well as sound financial ones.

**Physician-office®** will significantly reduce administrative cost of managing their practice, including streamlining patient registration, patient insurance verification, drug search, health plan formularies, prescription services, powerful physicians customization for diagnoses and procedure codes.

*"WEBeDoctor complete work flow solution is a great help for our medical practice. It has every thing we need to run our office more efficiently, provide better patient care, keep better charts and records. "*

**Shahid Farooqui, MD**

# Physician-office®

## Features

- Appointment Scheduling, true EMR and Billing
- HIPAA Compliant, New NPI Compliant
- Daily Data Back up and Free Regular Update
- Complete Patient and Financial Management
- Fast, Secure and Reliable
