

**A Fully Integrated Cloud-Based
EMR and Practice Management
Solution for Neurologists**

WEBeDoctor understands that specialists require more than just a standardized EMR Practice Management Solution. We have collaborated with neurologists and their staff's in order to provide them with a specialty relevant solution unique to the demands of Neurology. WEBeNeuro is the solution that neurologists want and need. Integrating WEBeNeuro into your neurology practice allows for more patients to be seen each day; improved patient encounters, reduces neurology practice costs, and ensures complete patient privacy, and safety.

WEBeNeuro is the most efficient way for neurologists to increase their profits, manage patient records, and streamline office workflows. The current templates in WEBeNeuro were designed by neurologists themselves--perfect for single and multi-physician offices. Your custom practice templates and forms will become integrated into your account, at no additional cost.

Using WebeDoctor's Neurology Speciality Module, you can be confident that you are providing the best medical care and patient encounters, while meeting all CMS Regulations. WebeNeuro is an INFOGARD 2014 Edition Certified Complete Solution that is HIPAA, ONC-ACB, and ARRA Certified Compliant.

WEBeNeuro's Practice Management, EMR, and Medical Billing Software (ICD-10 compliant) are a fully integrated, single database software solution. It strives to not only give you and your practice the software to automate patient record documentation, but also provides you with image storage / viewing / retrieval, data storage, and other tools that guarantee a fast and complete return on investment.

Neurology-Specific EMR Templates

- ▶ Point-and-click SOAP note templates
- ▶ Custom Neurology SOAP note templates
- ▶ Neurological exam templates
- ▶ Nerve Conduction Study templates
- ▶ Neurology diagnostic templates
- ▶ Image uploading (CT, MRI, etc.) viewing and storage
- ▶ Customizable Neurologist referral letter templates

The screenshot displays two main components of the software interface:

- Nerve Conduction Study - Bilateral Lower Extremity:** A data entry form with columns for 'F-WAVES MSEC', 'Norm DISTAL', 'Norm AMP-DIS unit', and 'AMP-PROX unit'. It lists various tests such as 'Right Peroneal Motor (Across Popliteal Fossa)', 'Right Peroneal Motor (Below Fibular Head to Ankle)', 'Right Superficial Peroneal Sensory', 'Right Tibial Motor', 'Right Sural Sensory', 'Right Medial Plantar Sensory', and 'Right Lateral Plantar Sensory'. Each test has input fields for 'TEMPERATURE', 'F-WAVES MSEC', 'Norm DISTAL', and 'AMP-PROX unit'.
- Patient Medical Record:** A sidebar showing patient information for 'Name: ARI, ALEX', 'DOB: 12/1976', and 'Age: 40Y 0M (Male)'. It includes sections for 'Assessment' (listing 'Assessment', 'Lab Test Reports', 'Procedure Reports', 'Diagnostic Reports', and 'Clinical Summary'), 'Plan' (listing 'New Meds', 'Plan of Care', and 'Visit Order'), and 'Visit Note'.

Features

- ▶ InfoGard 2014 Certified System
- ▶ ARRA approved for "Meaningful Use"
- ▶ Cloud / Web Based ASP
- ▶ Practice Workflow Management
- ▶ Nerve Conduction Study Templates
- ▶ Diagnostic & Treatment Templates
- ▶ Neurology drug database with interaction alerts
- ▶ Neurology-specific ICD/CPT codes
- ▶ E&M coding assistance for neurologists
- ▶ Electronic prescriptions (standard & controlled substance formularies)
- ▶ Custom Neurology SOAP Note Templates
- ▶ Neurological Exam Templates
- ▶ Custom Practice Forms
- ▶ Customized patient portal
- ▶ Bi-directional Lab interface (Quest, LabCorp, others)
- ▶ Custom decision support (ADE, coding)
- ▶ Billing/scheduling software interface
- ▶ Document/image management
- ▶ MAC, PC, Tablet, iPad, Smart Phone compatible
- ▶ HL7 custom interfaces
- ▶ Free support, training, and upgrades

Benefits

▶ **Maintain a patient-centered practice**

With WEBeNeuro, patient information is instantly accessible to you and your staff. Now you can easily view your patients' historical medical records in real time. WEBeNeuro captures all of your patient related messages and assigns them to the appropriate medical record---keeping your office's health records up to date. Many Neurologists have found that point-of-care charting significantly improves overall documentation quality and compliance.

The WEBeNeuro specialty module produces comprehensive, accurate, compliant documentation in minimal time.

▶ **Facilitate risk management:**

Illegible charts and prescriptions are a thing of the past! Errors caused by illegible handwriting, unclear abbreviations, dosage errors, unclear orders, or fax clarity issues are done away with. WEBeNeuro, will automatically save, and store your patient data on secured data center servers. Since records are automated, the risk of documentation audits is significantly reduced. Compliance with HIPAA regulations is much easier to meet as well.

▶ **Cloud-based:**

WEBeNeuro is a Cloud-based (web-based) solution, which allows for operational statuses and activities, to be monitored without physically being in a communications center. A Cloud-based system provides remote access to live information without sacrificing security. Multiple users can be on the WEBeNeuro system at the same time. Mobile devices such as MAC's, P/C's, iPads, notebooks, laptops, and even smartphones can access the system concurrently.

▶ **Security:**

WEBeNeuro uses the highest level of security available---128-bit encryption. This level of security is the same encryption used in online banking. Information can be restricted at the user level, physicians can

grant their staff the ability to log actions without sacrificing the integrity of patient information or data security.

▶ **Revenue cycle management:**

WEBeNeuro is a complete patient care and revenue cycle management solution. This system easily lets you determine insurance eligibility and patient insurance coverage, guaranteeing your facility reduced denials and increased reimbursements. This feature improves your workflow processes by enabling your staff to quickly validate coverages, and accurately authorize services prior to your patient's appointment. In addition, WEBeNeuro provides fully integrated HCFA 1500 & UB-04 Medical Billing capability, and electronic claims processing module for your facility. WEBeNeuro provides analysis and reporting capabilities so Neurology Professionals can better manage insurance payers, as well as individual cash patient accounts.

▶ **Eliminate time consuming office processes:**

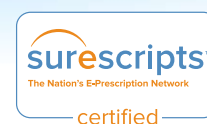

Searching for lost charts is extremely time consuming and unproductive for your practice. WEBeNeuro eliminates time lost, because documentation is created during the patient encounter, instantaneously organized electronically, leaving you and your staff to spend more time on patient care. Paper charts and folders are all eliminated with WEBeNeuro. Now that your patient information is electronic, you and your staff can view this information at the same time, any time, allowing for multiple tasks to be completed at once.

▶ **Cost:**

Since WEBeNeuro is Cloud-based, the cost for a complete solution is much less expensive than any traditional client/server based software. Multiple devices can be used with WEBeNeuro concurrently including P/C's, MAC's, iPads, Laptops, Notebooks, Tablets, Smartphones, and even Desktops. Eliminating the need for servers and data rooms provides you and your practice with not only the opportunity to save capital expenditures, but also the opportunity to re-invest in the practice. On top of that, all System updates, and maintenance releases are included in the monthly service fee.
